Products Supplied to Omagh Council Offices

***Centrel Addressable Emergency Lighting Testing System - Emergi-Lite.
Bulkhead Luminaires and Legend Plates – Emergi Lite***

The Centrel System is an addressable emergency light testing system of extensive capability. The system can be managed either by a user PC, a dedicated PC or a data handling control depending on the local control requirements. A range of Centel compatible luminaires were supplied on this project, each programmed with a 'soft' address, which is used by the interface unit for interrogation and fault diagnosis.

Alfred J Hurst Ltd were involved at an early stage of the project. We also assisted the installing electrical contractor giving advice on practical matters including cable structure, installation technique and system setup.

Technical information, catalogues and costs for all the above products and many more can be obtained from Alfred J Hurst Ltd. You can contact Patrick Rogan by email; pat.rogan@ajhurst.com or by telephone on; +44 (0) 28 9077 0037
